HIGH DURABILITY AND EXCELLENCE CERAMIC PRODUCTS

LINE
SOURCE
FUNNEL

Cass Source is a high performance Hookah Bowl Phunnel made of Gres (stoneware), with a ceramic glaze revestment of high quality, that provides you an easier way of cleaning, making it perfect for sessions with aluminum foil and heat management. Another great distinctive of our Hookah Bowls refers to a standardization to the conical fit to the hookah, which ensures a great sealing and stability.

THERMOCERAM & CASS HOOKAH

Established in 2002 in the city of Mogi Guaçu, São Paulo, Brazil, we began our activities through the development and production of porcelain jars for fast mills.

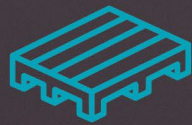

Through those years we added to our products portfolio the refractory melting pots for glass melting, the porcelain decorative paints and the hookah's bowls for many brands. Today, envisioning another moment of innovation, we launched our own brand of Hookah Bowl "CASS HOOKAH".

Our Hookah Bowl has many exclusive formats, facing the development of new technologies, varieties of colors and effects, in addition to a lot of quality in terms of its finishing and technical characteristics.
